-  Damp mops 10
-  Special mops 16
-  Ergonomic handles 24
-  Microfibre cloths & disposables 26

Which mop is the right one in each situation and why?

This brief guide will be of great help when you want to check which of our mops is best suited to a given task.

Each mop offers several advantages, but to keep things simple we have chosen to focus on just a few advantages for each mop in this guide. The aim is to make it easy for you to choose the right mop and achieve the best possible cleaning result.

Effective textiles for effective cleaning

Tip:

Open the flap for an overview of the mops in each category and a guide for preparing each type. Leave the flap folded out as you browse the guide.

Preparation guide

for 10 mops

Dry mops are used without liquid to collect dust and loose particles.

Damp/dry mops can be used damp or dry.

Damp mops can be used damp – direct from the washing machine or moistened in Vikan's mop preparation box.

Wet mops add liquid that loosen dirt on the floor/surface. When using a wet mop, it is recommended that you dry afterwards using a dry mop.

Microfibre cloths work like a magnet that attracts dirt by drawing it into the material and holding it there.

Dry mop

Depending on the task, a dry mop either has a large amount of microfibres – to ensure the effective removal of even the smallest dust particles, or a structure to ensure the effective removal of sand and larger dirt particles, etc.

Item no. 5471xx

Dry 24

Polyester mop for dust and larger particles.

Ideal for sweeping all types of hard, flat floors, where dry mopping can replace damp or wet mopping.

The fibres collect the dust, dirt and hair.

This mop is ideal for use in corridors and high-traffic areas.

Suitable for collecting hair.

Washing instructions

Applications

Floors

- All floors
- Corridors
- Wax/soap-treated floors

Dirt

- High level of large, loose dust particles
- Dust

Variants

Pocket	25 cm	40 cm	60 cm
		✓	✓

Damp/dry mop

The microfibre edges generate static electricity that traps all dust and dirt particles during dry mopping. The mop is reinforced with polyester in the middle to reduce friction when damp mopping.

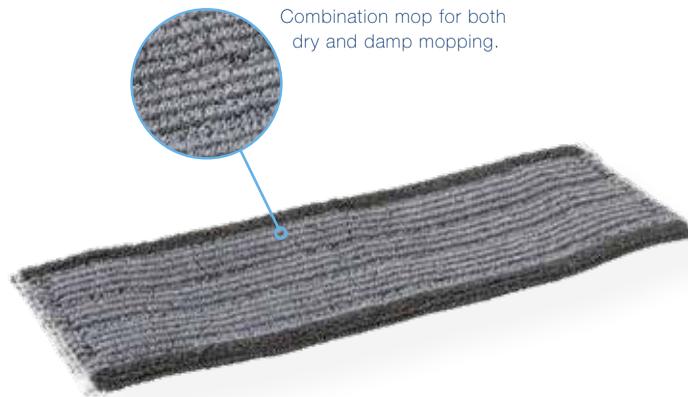

Item no. 5476xx

DampDry 31

The result is faster, more ergonomic and effective cleaning.

Vikan DampDry 31 is designed for use in hotels, hospitals and other applications with strict hygiene requirements, and allows both damp and dry mopping using one advanced microfibre mop.

Combination mop for both dry and damp mopping.

Applications

Floors

- Hard/flat floors

Interior

- Table/cupboards
- Walls

Dirt

- Dust and dirt
- Sand
- Bacteria

Damp mops

Which damp mop you should choose depends on:

- The cleaning task – the type and quantity of dirt that has to be removed
- The type of floor – smooth, polished or with texture
- Larger quantities of microfibre increase the capillary action and friction

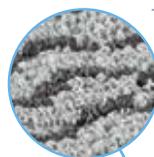

Item no. 5495xx

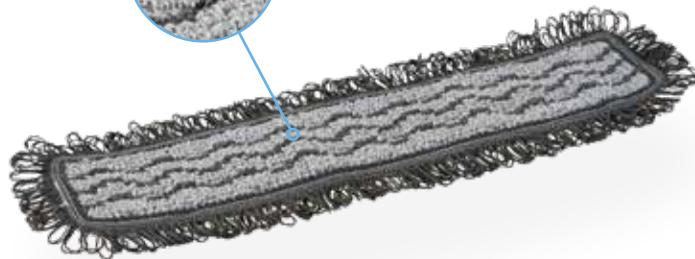

Damp 42 dark

Damp 42 is the perfect universal solution for most hard floors.

The unique microfibre wave pattern and loop edge, helps collect dirt and bacteria in a single cleaning process

The unique wave pattern helps to collect dirt and bacteria.

Item no. 5496xx

Damp 43

Designed for use in heavily soiled areas, where the thick microfibre yarn loops collect dirt and sand.

The cut yarn loops absorb and carry moisture at the same time, ensuring higher capacity and that the right amount of water is released to achieve effective cleaning in heavy traffic areas.

Designed with microfibre loops, suitable for cleaning more textured and worn floors.

Applications

Floors

- All types of floors
- Stairs

Dirt

- Sand
- Gravel
- Loose dirt

Special mops

Vikan has a number of special mops – each of which has been designed for a specific purpose.

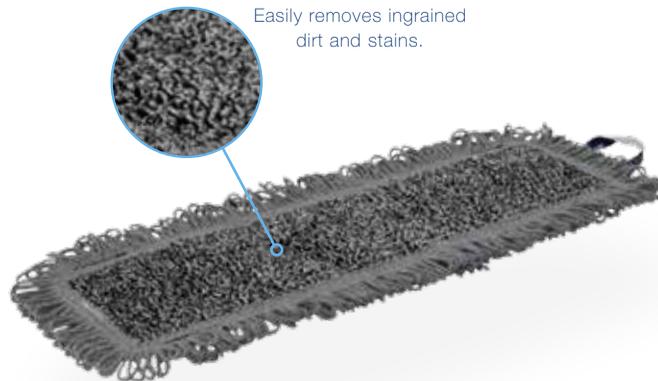

Item no. 5482xx

Wet Scrub

Everyday cleaning of non-slip floors does not always remove the most ingrained dirt.

Heel marks can be a recurring problem, especially on lighter-coloured surfaces.

The Wet Scrub Mop has been designed to handle both problems.

Washing instructions

Applications

Floors

- Non-slip floors
- Not suitable for wood and untreated linoleum

Dirt

- Difficult stains
- Ingrained dirt

Variants

Item no. 548400

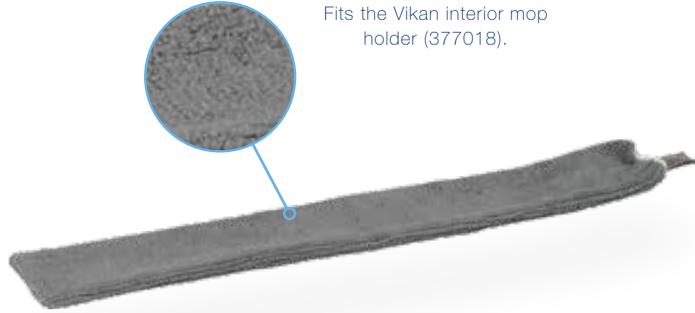

Interior mop

The interior mop is ideal for cleaning in hard-to-reach places, such as behind radiators.

When used dry, the microfibres collect dust, dirt and hair with the aid of static electricity.

Damp, the mop absorbs dirt and grease.

Washing instructions

Fits the Vikan interior mop holder (377018).

Applications

Surfaces

- Hard surfaces

Dirt

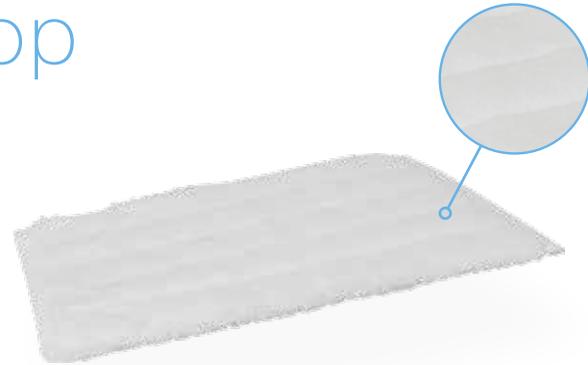

- Dust
- Debris

Item no. 549025

Table/board mop

Ideal for cleaning tables and boards.

The table/board mop contains microfibre and has been specially developed for cleaning blackboards and whiteboards and other high-gloss surfaces.

Washing instructions

Applications

Surfaces

- Tables
- Boards/whiteboards
- High-gloss surfaces

Dirt

- Fine dirt particles
- Dust and chalk
- Whiteboard markers

Ergonomic handles

When you work using our ergonomic handles, your muscles will feel far less exertion during and after the work. There are many good reasons for this. The most important are:

- The handle length can be swiftly changed by pressing a button at the top.
- The long, light and insulated handles with a hand-friendly diameter cause muscles to work less.
- The handles are made from durable impact-resistant material with a rugged telescopic lock
- The hand support facilitates working on vertical surfaces and at height.

Microfibre cloths & disposables

Can be used on all hard surfaces and is ideal for general cleaning of furnishings. Used dry, the cloth collects and retains the smallest dust and dirt particles using static electricity.

Damp, the cloth absorbs dirt and grease using capillary action.

Item no. 69101x

Original microfibre cloth

Vikan's Original cloth is made of our unique microfibre material.

The microfibres reduce bacteria levels. Can be used on all hard surfaces.

Tests have shown that Vikan's Original cloth can remove 99.9% of bacteria just using water alone.

- Dust
- Debris?

Item no. 652025 - 652060 - 652100

Disposables

Our single use, disposable mops and cloths offers extraordinary cleaning performance.

Used damp mops can clean an area between approximately 10-17 square meters but can also be used dry for collection of dust, dirt and debris. The mop is made from 100% recyclable polyester microfibre formed in small loops, which means that the contact surface between mop and the surface to be cleaned is decreased.
