It’s all in the details

The right tools tackle the areas that are easiest to overlook.

Hidden residues in tight spaces, complex equipment, and hard-to-reach areas can create contamination risks.

That’s why successful hygiene programs rely on detail cleaning tools specifically designed for the job, like those from Vikan’s Detail Cleaning Collection.

We’ve added three new fit-for-purpose tools to tackle the most demanding detail cleaning tasks.

Colour coded
Integrates into hygienic zoning and 5S lean programmes

Food-contact compliant
Purpose-built for areas where hygiene and food safety are critical

Scraping edge
Loosens stubborn residues before scrubbing to improve cleaning efficiency

90 degrees of coverage
Helps get into those really tight corners

Ergonomic design
Reduces worker strain and enhances comfort

Extra-small design
Clean hard-to-reach areas

Finger-stop
Added control and leverage during vigorous scrubbing

GROUT BRUSH · 4407x
Hard bristles
225 mm

Reaches into corners and joints to tackle stubborn soils like baked-on dough, mineral scale, and dry biofilms.

DETAIL BRUSH · 4408x
Extra-slim profile
225 mm

The angled head cleans around equipment joints, conveyor belts, and other hard-to-reach areas.

SMALL DETAIL BRUSH · 4410x
Long handle, extra-small head
200 mm

Designed for precision cleaning like reaching into machinery and other difficult-to-clean spots.
